

Spring MVC

22 redirect와 forward

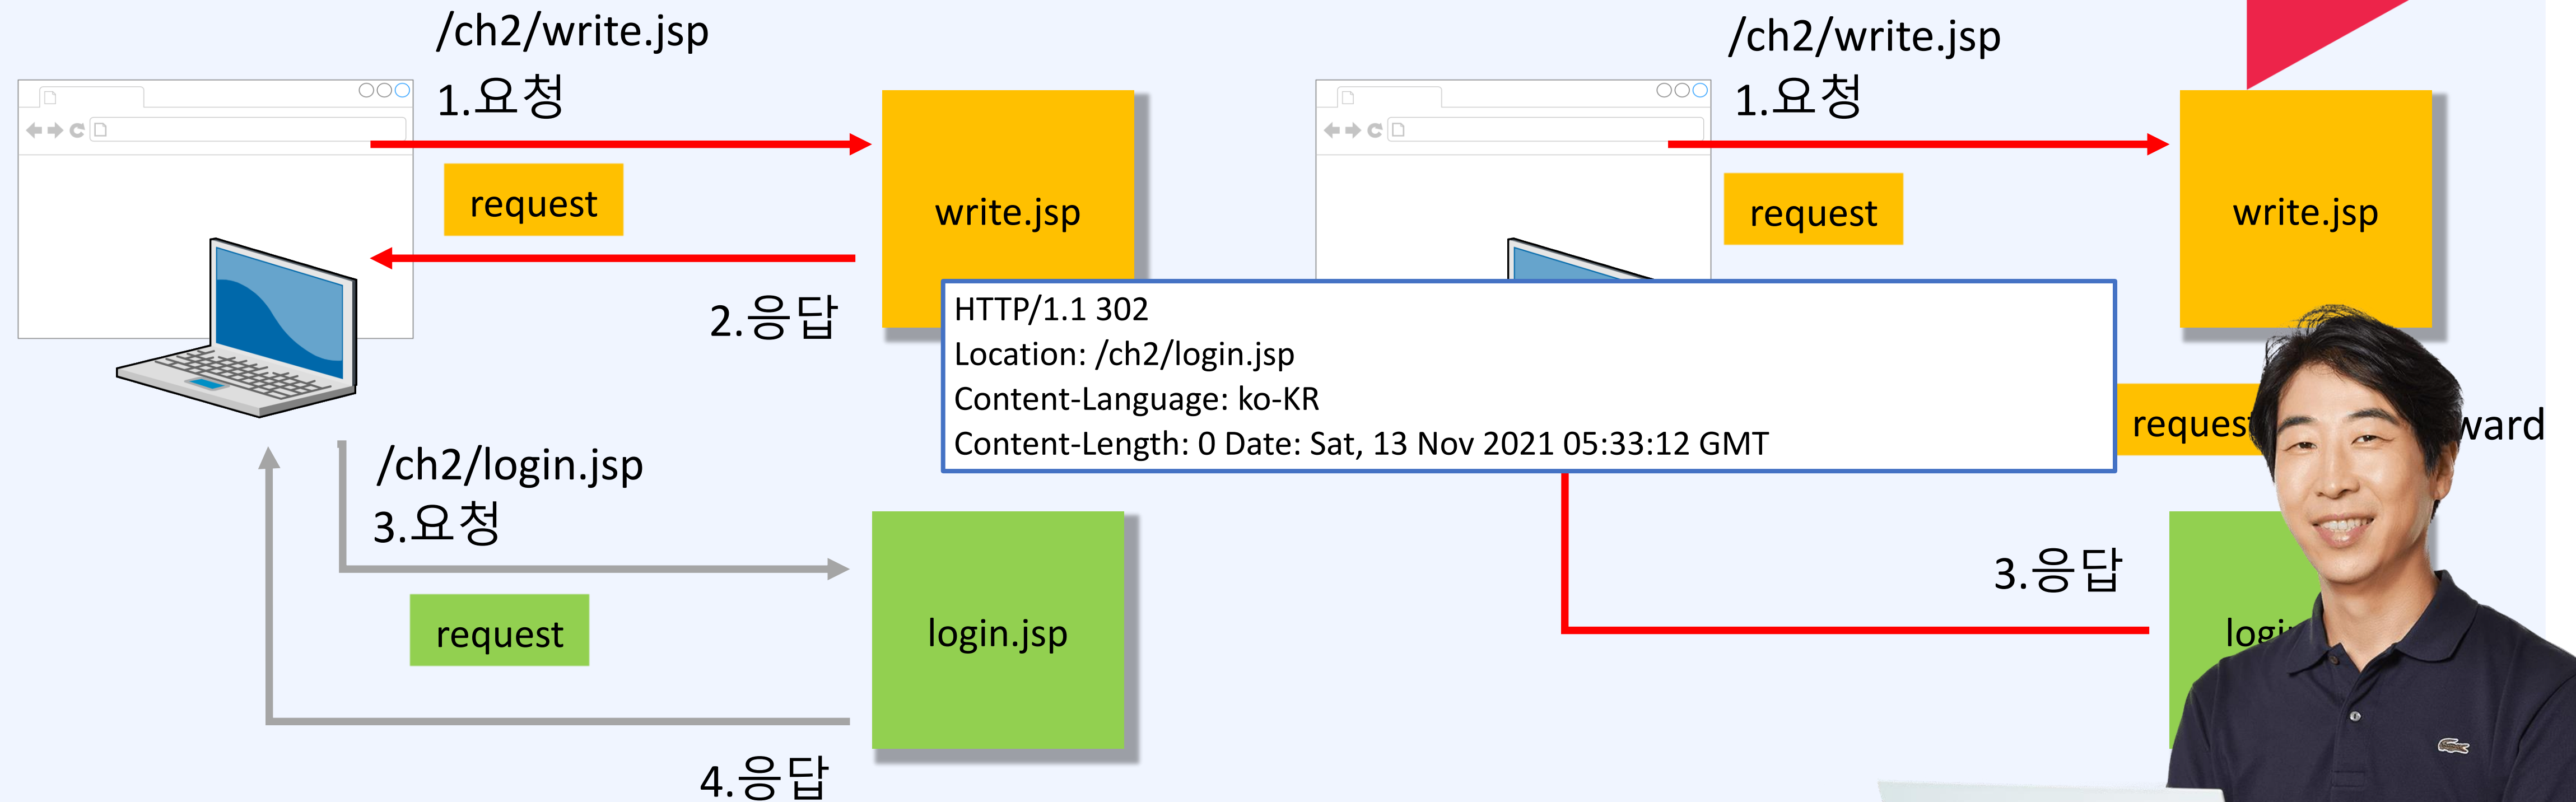

redirect와 forward

1. redirect와 forward의 처리 과정 비교

2.

Spring MVC

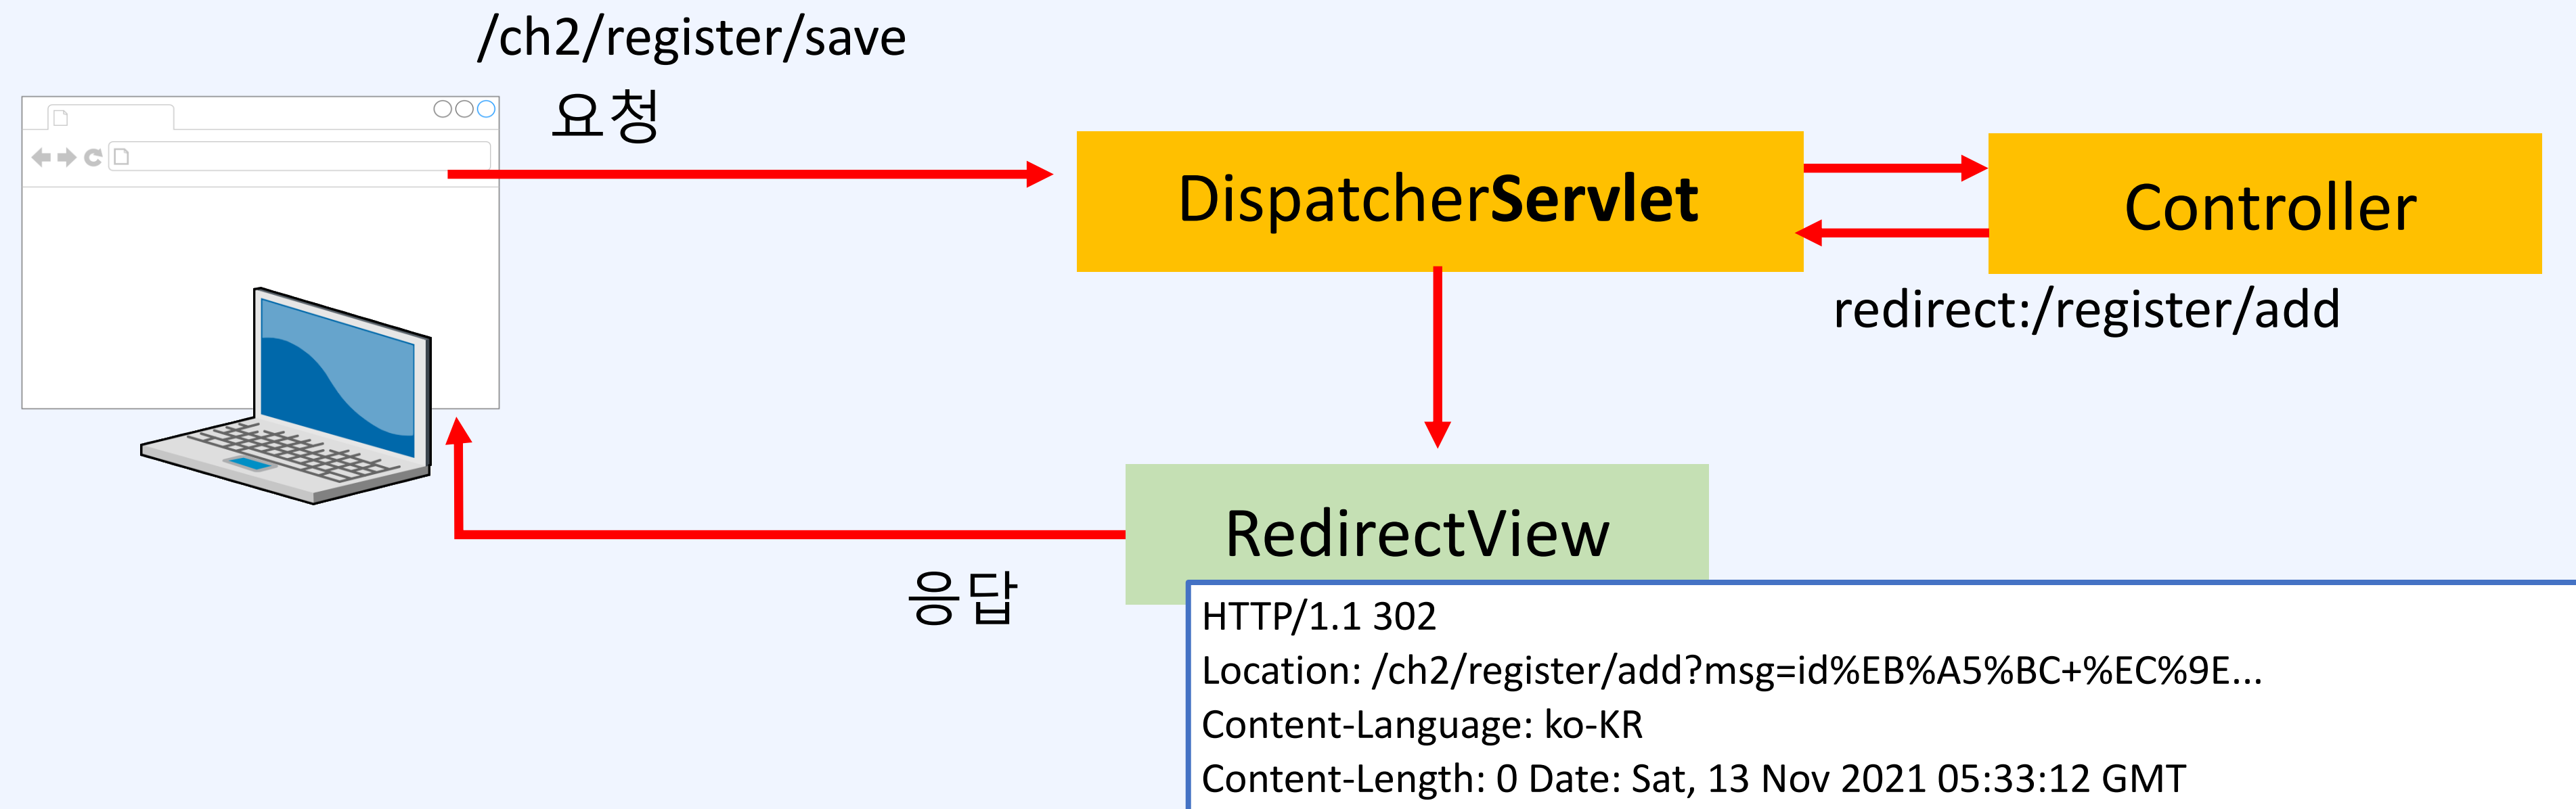

redirect와 forward

2. RedirectView

2.

Spring MVC

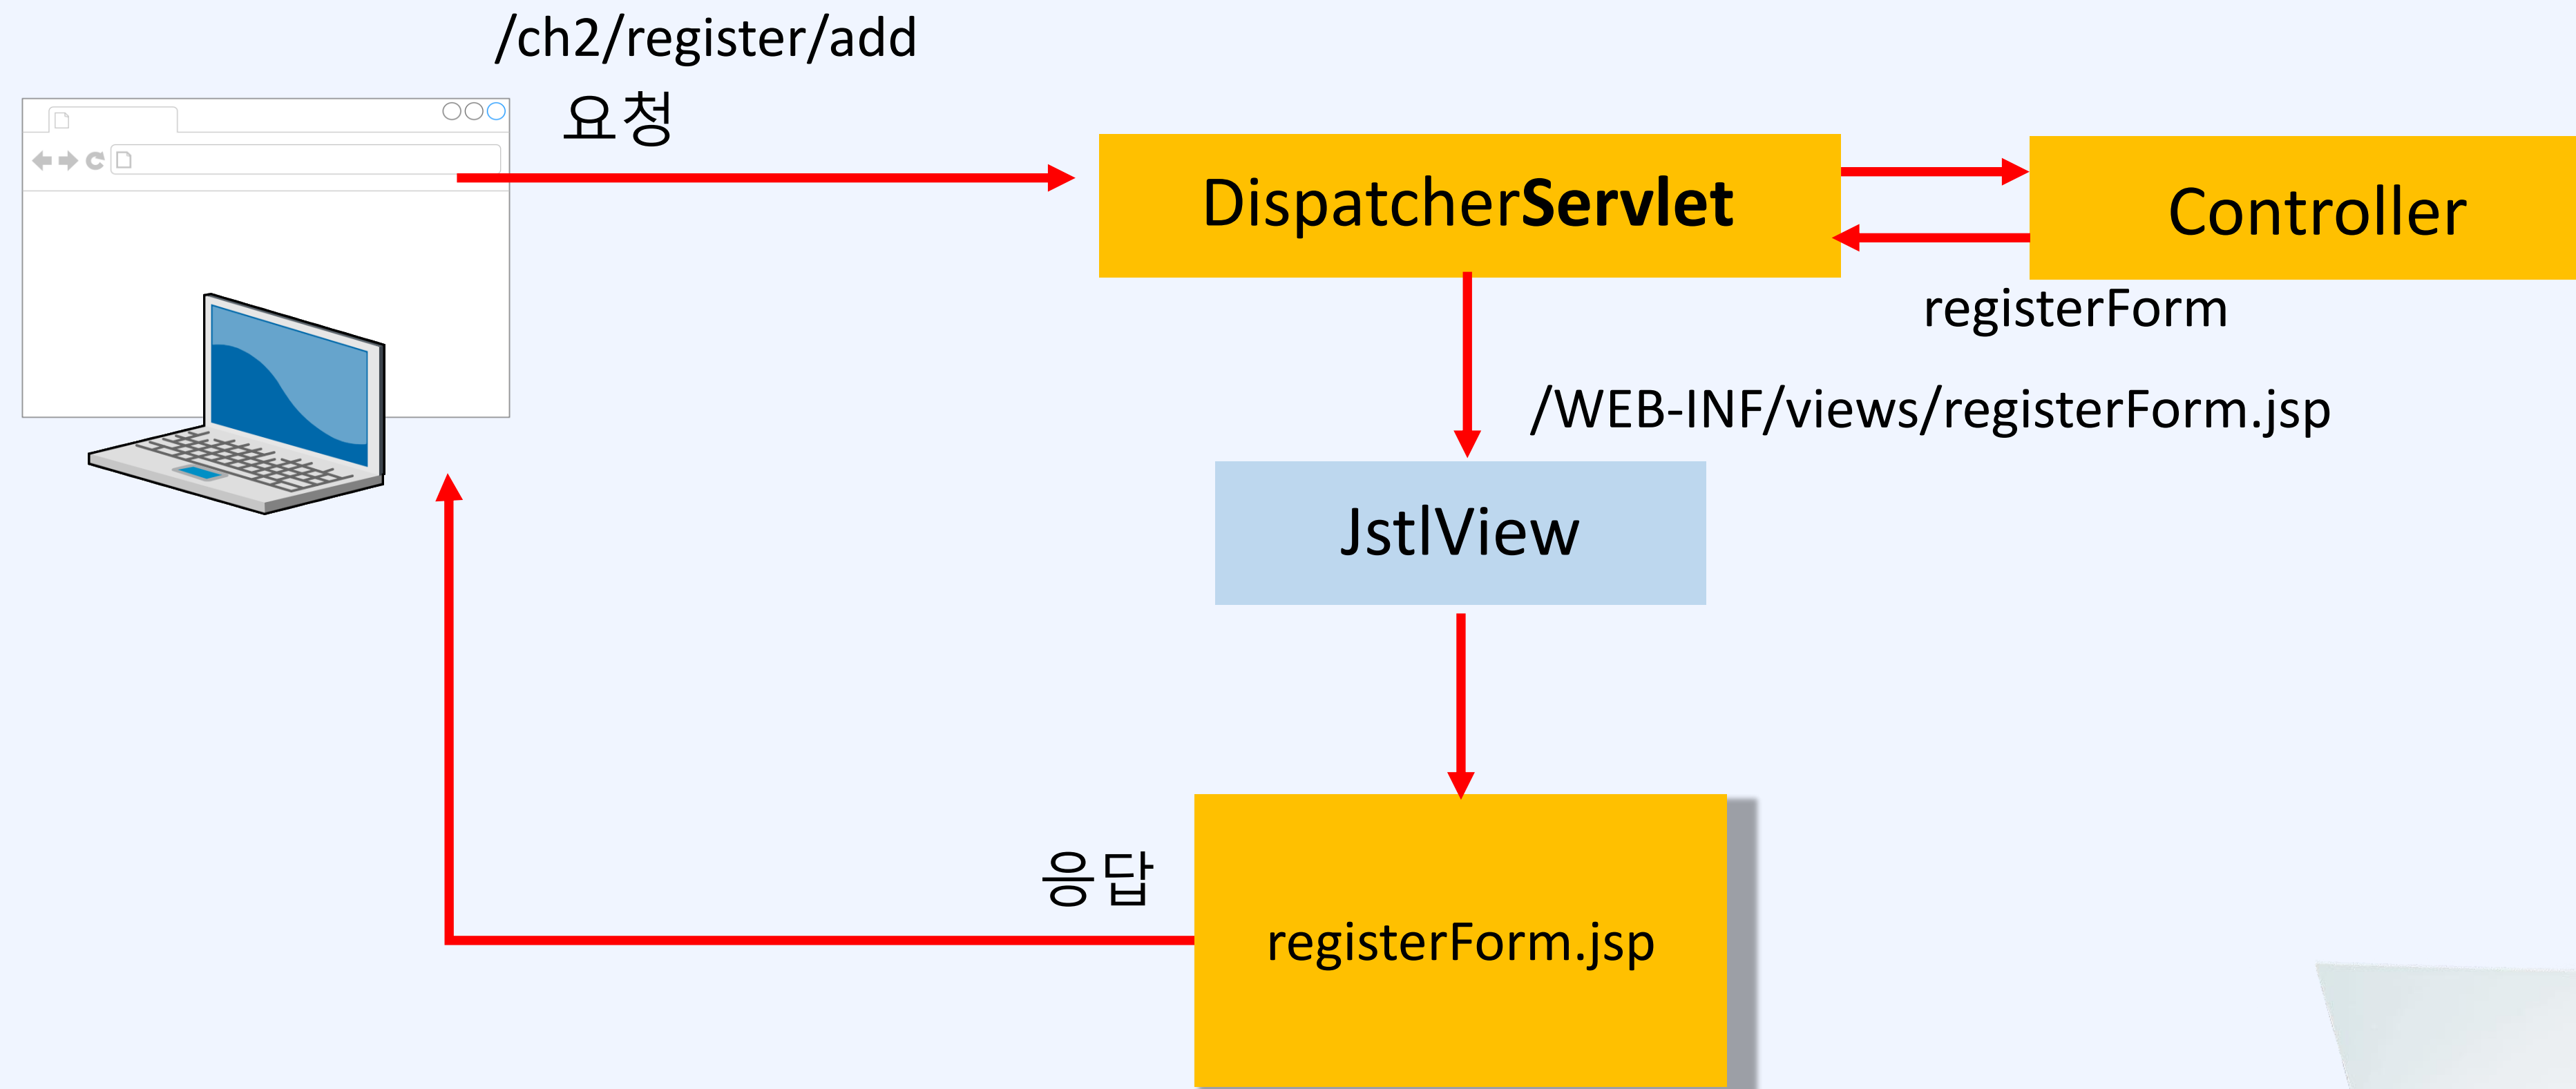

redirect와 forward

3. JstlView

2.

Spring MVC

redirect와 forward

4. InternalResourceView

```
@PostMapping("/register/save")
public String save(User user, Model m) throws Exception {
    if(!isValid(user)) {
        String msg = URLEncoder.encode("id를 잘못입력하셨습니다.", "utf-8");

        m.addAttribute("msg", msg);
        return "forward:/register/add";
    }
}
```

redirect와 forward

4. InternalResourceView

```
@GetMapping("/register/add")  
public String register() {  
    return "registerForm";  
}
```

redirect와 forward

5. forward의 예시

2.

Spring MVC

```
@RequestMapping("/download")
public String download(HttpServletRequest request,
    @RequestParam(required=false, defaultValue="") String type) {
    List<User> userList = getUserList();
    request.setAttribute("data", userList); // request에 저장하면, forward된 곳에서 사용가능

    if(type.equals("pdf")) {
        return "forward:/pdfView";
    } else if(type.equals("csv")) {
        return "forward:/csvView";
    }

    return "forward:/txtView";
}
```
